

Booralie Island Parent Information

Information:

Booralie Island is a locked-down 3D Virtual Environment accessible only by students and teachers of Northern Beaches Christian School.

It provides a *learning space* to enhance learning, through both structured class activities such as debates, discussions, re-enactments and performances, and open ended creative projects such as designing, building, programming and showcasing of student work.

With your permission, students may access this virtual space from home. They access the world using the free 'Second Life' program accessible from <http://secondlife.com/support/downloads.php>.

All students agree to the 'Booralie Charter' before participating. Note in particular that communications by students are logged and checked, and that students agree to balance their participation in Booralie Island with the rest of their busy lives.

Steve Collis,

Director of Innovation
Northern Beaches Christian School

I give my son/daughter _____ permission to access
Booralie Island from home.
